

What is coronavirus (COVID-19)?

COVID-19 is a respiratory illness that can spread from person to person.¹

Quest Diagnostics does not currently collect specimens for COVID-19 testing. Please ask your healthcare provider about testing.

Testing is provided ONLY by physician offices, hospitals, and clinics.

If you think you may have been exposed to COVID-19 or have symptoms:

- Discuss your symptoms with your healthcare provider.
- Your healthcare provider will determine if you need to be tested based on your symptoms, and public health and CDC testing criteria.
- If you do need to be tested, your healthcare provider will collect the appropriate specimens.

Do your best to avoid contact with others, cover your cough, wash hands frequently, and regularly clean or disinfect things you touch.
